'Hjos' is Spanish for sons. Having been friends for over 20 years, we have shared our love for music, guitar, food and had many great times together. We have also both been blessed with the opportunity to raise our wonderful children who have inspired us to write and record this new music. We also like the allegorical meaning of the word sons, evoking continuity, learning, development, blossoming, as the torch is passed from son to son.

We both would like to dedicate this music to our children, our whole families and friends 'here, there and everywhere' with the hope that our music will bring as much enjoyment as we have had in the making of this album.
